

Interactions

The following are examples of typical Stakeholders that a risk subject may need to interact with in order to deliver its Targets:

- Customers
- Suppliers
- Competitors
- Employees and their representatives (Permanent and Temporary)
- Owners/Shareholders/Lenders/Auditors
- Governments (local, regional, national, international)
- Non-governmental authorities/rule makers
- Industrial bodies and creators of standards
- Interest/pressure/lobby groups
- General Public, representatives and influencers
- (For internal risk subjects) other departments/functions
